SUMMARY

Full Stack Developer skilled in developing and deploying scalable web and mobile applications using MERN, Python, Flutter, Angular and .NET. Experienced in React.js, Node.js, REST API development, Android/iOS applications, AWS, Azure, AI integration and automation, with a focus on building reliable and production-ready solutions.

EXPERIENCE

Full Stack Developer

XLPXL IT Solutions

- Dec 2024 - Present
- Developed and deployed web and mobile applications using MERN, Python, Flutter, Angular and .NET.
- Built and integrated REST APIs and worked on Android/iOS applications.
- Deployed and maintained production applications on AWS and Azure.
- Integrated AI solutions and automation workflows to improve application functionality and efficiency.

Python & AI Developer - Intern

Ridlan AI Foundation

- Jan 2025 - April 2025
- Worked on an AI project leveraging Python, Machine Learning, and AI to develop intelligent solutions. Implemented data preprocessing, model training, and predictive analytics, enhancing automation and decision-making capabilities.

Jr. Application Developer

PSHG Technologies

- May 2024 - Jul 2024
- As a Junior Application Developer at PSHG Technologies, developed a Flutter app with Firebase, implementing user authentication and real-time data sync while ensuring timely feature delivery.

Web Developer

Tinkerhat Foundation & HD Media

- Feb 2023 - Jul 2023
- Developed responsive web interfaces and enhanced backend functionality using HTML, CSS, PHP & JavaScript at Tinkerhat Foundation & HD Media, improving UI/UX and problem-solving skills.

EDUCATION

Bachelor of Computer Science

Vivekanand Education Society College of Arts, Commerce & Science

- Jul 2022 - Apr 2025 Mumbai

Higher Secondary Education

Swami Vivekanand Vidyalaya & Kanishtha Maha Vidyalaya

- Jul 2021 - Apr 2022 Mumbai

Secondary Education

Swami Vivekanand Vidyalaya

- Jul 2019 - Apr 2020 Mumbai

SKILLS

Advanced :

Python	JavaScript	Azure	PHP
REST API	HTML	CSS	SQL
MERN	Flutter	Firebase	.NET
Angular	AI Automation	Git	

Beginner :

Linux	Solidity	Typescript
-------	----------	------------

KEY ACHIEVEMENT

AVISHKAR Projects | AVAHAN (2023) & Blockchain-Based DB (2024)

AVAHAN is a SOS Android app for women's safety, while the 2024 project integrates blockchain to design a decentralized data warehouse at a state-level convention.

1st Prize - Web Cloning Hackathon

Won 1st place at Guru Nanak College on 14th Dec 2024 for building a responsive website clone using PHP, CSS, and a functional database.

CLIENT PROJECT

Full Stack Web Developer

AI Dubai Cream - Ecommerce

- Apr 2024 - Jun 2024
- Developed and optimized AI Dubai Cream, an e-commerce website for skincare products, ensuring smooth performance and a seamless shopping experience. Live at aldubaicream.com

OTHER PROJECTS

Student Complain Man. System

Using Python and Mysql

A desktop system in which student can complain against any issue in organization

Staff Tracker

Using Python and Mysql

A desktop system in which Organization can manage staff details or other staff related work

Rail Bites

Using Android/Kotlin, SQLite & API

An Android application in which costumer can order food during travelling in inidan trains

Pret Atma (Haunted Game)

Using Unity and C#

A spine-chilling horror game, featuring immersive environments and AI-driven enemies.
